

# Abhijeet Singh

Software Developer based in Vancouver, BC.  
Crafting engaging experiences for the Internet.

With a creative approach to development, I add intuitiveness and life to my work. Building beautiful interfaces and performant backend applications for professional, academic, and personal projects. Outside of programming, I enjoy making 3d renders and animations.

## Experience

---

### AvenueHQ | Vancouver, Canada

*Junior Full-Stack Engineer | Mar 2022 - Aug 2022*

- Worked on a digital marketing tool for realtors through North America.
- Built a performant client facing API-driven application in React.
- Used Laravel and SQL to build fast, efficient and scalable databases and APIs.
- Collaborated across internal teams to clarify requirements, explore issues, provide updates, and present discoveries.

### Outlined.co | Bangalore, India

*Software Engineer | Sept 2019 - Oct 2020*

- Developed and maintained the company's product marketing website and flagship design platform using FabricJS and Laravel.
- Built a PDF to HTML canvas converter using JavaScript and Shell Scripting to import and export design files on the browser.
- Implemented API Integration for data storage, social media interaction, text sentimental analysis, and stock image services.
