Crafting engaging experiences for the Internet. With a creative approach to development, I add intuitiveness and life to my work. I build beautiful interfaces using React, Framer Motion, & Tailwind CSS; and performant backend applications using NextJS, Laravel (PHP), & MySQL. Outside of programming, I enjoy making 3d renders and animations using Blender.

EXPERIENCE

Junior Full Stack Engineer   Mar 2022 - Aug 2022

AvenueHQ, Vancouver, BC
- Worked on a digital marketing tool for realtors through North America.
- Built a performant client facing API-driven application in React.
- Used Laravel and SQL to build fast, efficient and scalable databases and APIs.

Software Engineer   Sep 2019 - Oct 2020

Outlined.co, Bengaluru, India
- Developed and maintained the company's product marketing website and flagship design platform using FabricJS and Laravel.
- Built a PDF to HTML canvas converter using JavaScript and Shell Scripting to import and export design files on the browser.
- Implemented API Integration for data storage, social media interaction, text sentimental analysis, and stock image services.

EDUCATION

Post-Graduate Diploma - Web & Mobile App Design and Development   Sep 2020 - Jan 2022
